No Permit to Pollute - Hold DTE Accountable

Public Hearing on Zoom - Tuesday, November 28th, 6:00pm ET

DTE is still trying to sneak a rogue permit to pollute past us. Thanks to YOU and the people who pushed back - we have been granted a public hearing on this issue! **Let's pack the (virtual) halls! Help us keep putting the pressure on to Save Our Water and Our Health!**

Here is everything you need to make an official comment at this hearing

To register for the hearing on Zoom: <https://bit.ly/45FwK6k>

Follow the link above, fill in the form, and click Register.

To make your comment:

Below is a sample script you can use to make your comment to the Michigan Department of Environment, Great Lakes, and Energy (EGLE)

Hello, I am [name] and I am a [Michigan/other] resident. Fermi 2 is polluting Lake Erie with dangerously heated, toxic wastewater, and I call on EGLE to redraft Fermi 2's permit to protect our waters and our health.

We need:

- *Thermal limits for Fermi 2, in alignment with EPA recommendations*
- *Regulation of radionuclide discharges to protect our drinking water*
- *Fermi 2 to immediately stop discharging banned chemicals into Lake Erie*
- *EGLE must issue a new and approved permit with these protections*

Adding to your comment:

- You can deliver your comment using just the script as is to register your concern, or you can adapt it to include your own perspective. When adding to your comment, you can use these guidelines:
- Story of Self - Anecdote that connects you to the problem & solution. Evoke emotion, humanize yourself to EGLE.
- Story of Us - Connect your story to the bigger picture. Bring in the data, facts.
- Story of Now - and that's why it's critical that you redraft the permit to include:
 - Thermal limits for Fermi 2, in alignment with EPA recommendations
 - Regulation of radionuclide discharges to protect our drinking water
 - Immediate end to the discharge of banned chemicals into Lake Erie
 - And issue this new and approved permit
